

I am sending you my medical records to prove all of this and my book I wrote after this 5 year journey from what I call my most expensive hotel stay in my life **Herman Memorial in the Woodlands Texas. .**

I was admitted after my family called 3 times and the ambulance refused to take me to the hospital because they said my oxygen was at 80 and they said the hospital protocol was under 80. By the time they finally took me in that night I was down to 40 oxygen, and unconscious. I believe if they would've taken me earlier , I would never have gotten worse. family was told to make burial arrangements the first night.

When I was admitted, no one was allowed to see me and I was quarantined for 2 weeks. I don't remember anything. Please look at my medical records to see the information. What I do remember is being restrained, And only whenever my family left from visiting . They refused to let anyone but my immediate family visit. I was given my last rights 3 times by a priest outside a window. My priest wasn't even allowed in.

I refused the ventilator and remdesivir but they gave me 3 weeks of remdesivir anyways. After my family said no. I was so upset when I saw it on my medical records. My family then after the 11th day, they made them put a feeding tube in, they convinced a nurse to do it. I was told by the nurse that it was against procedures, no one else was being fed either. I personally believe it is why I survived. It turned me into a diabetic though.

I was given so much morphine when I left I had cold sweats for 2 weeks. I had ICU delirium and nightmares. I kept telling people someone was abusing me. I was told to stop it. But every time someone let me use their phone, I called 911 and asked for help. I trully believed I was in a different state and it was 2018.

This experience made me , a healthy 55 year old woman, turn into a disabled person on oxygen for life. They offered a lung transplant but I refused. There were pages and pages in my medical records stamped with a red stamp that said unvaccinated female. I would like to know what my vaccine status had to do with anything?

After I came home in a wheelchair and on 4 liters of oxygen , in diapers I was refused home care and the insurance refused to pay for my oxygen. I couldn't even get pulmonary rehab. I had to pay \$5,000 myself, my husband used his entire saving on oxygen machines, therapy and ambulance bills.
