

My Mom, Edna Wylene LaBlaine was admitted to Baylor, Scott and White hospital in Grapevine, Texas. She had pneumonia symptoms and had tested positive for Covid 19 at her Assisted Living Facility. I was aware of the drug hydroxychloroquine and asked the hospital doctor to give that drug to her. The doctor said it isn't used for Covid 19. The Doctor recommended Remdesivir. I wasn't aware of this drug but I trusted the Doctor. Of course my Mom was in the Covid section of the hospital. No visitors allowed. It was very emotional only being able to talk to her on the phone. My mom passed away in the hospital on August 12, 2020. I believe the Remdesivir killed her. Dr. Fauci is a criminal and should be locked up. In early 2020 Dr. Fauci said Remdesivir would be the "standard of care" for treating coronavirus disease.

I miss my Mom very much!

I hope Dr. Fauci is prosecuted and locked up!
