

My mother Marla A Brearton was taken to the hospital by my sister Tina Roe. My mother was diagnosed with covid 19 and admitted. When I visited on that Friday 5th I was told I could not sign my mother out of hospital and that she had a case worker in charge of my mother's health care. I was harassed and told to put on protective gear. On the medical board there were notes written with the instructions no remdezevir. Those were my words of request. My mother did not want a breathing mask but one was strapped to her face. When my mother gained consciousness the nurse immediately drugged her and she was knocked out. I asked the male and female nurses to give my mother m. Hydroxychloriquin and ivermectin. The male nurse said and I quote! " I want to do everything you are telling us but we can't". The doctor never came to speak to me and I waited hours. We received news on Tuesday my mother Marla Ann Brearton was doing better and would probably be coming home tomorrow. She died 2am that evening.
