

Thank you for asking for our experiences with hospital protocols during the “COVID” pandemic. It matters. Jack Wolfsen was a husband, dad, grandfather, friend, artist and veteran. Jack was admitted to Harris Methodist Hospital, Fort Worth, Texas on 9/22/21 after being diagnosed with “Covid” at a local urgent care. His family was not “allowed” to see him per hospital policy. After numerous phone calls to nursing staff and directing he NOT be given Remdesivir, it was discovered he had been given Remdesivir per hospital policy. Family was NOT ALLOWED, per hospital policy, to see him until 9/27/21 and only for minutes. The family begged for alternative treatments and were denied. We presented right to try documents officially to ICU nurses/staff on 10/3/21. The document presented is attached. It was signed by his wife and medical power of attorney, Yvonne Wolfsen. Yvonne was recovering from Covid at home during same time period and alive today. The video of the exchange with hospital staff WHEN PRESENTING right to try documents is in our possession, however, I was not able to upload because it is not a PDF. We also have recorded phone calls with various hospital administrative departments regarding visitation. Jack met the Lord on 10/7/21. His family was “allowed” to say goodbye within hours of his departure from this earth. Justice and change is due for the atrocities that impacted so many. My name is Jennifer Edwards, I am in the video and personally presented these right to try documents to Harris Methodist Fort Worth with Jack’s son, , Mike Wolfsen, while his daughter, Angel Legate was in parking garage. The hospital would only “allow” two persons to present documents to hospital staff. We were not permitted to see Jack even though we were literally a hallway away on the ICU floor. Cruel. Myself, his son and daughter are all willing to rearrange anything and everything to testify to our experience and speak for our loved one who can not. We were robbed of his love and life. Thank you for your efforts to hear our family and protect humanity. Sincerely, Jennifer Edwards
