

My Uncle died at TEXAS Health Presbyterian Dallas on October 28 2021. I was not allowed to visit. The dates I put for the REMDESIVIR are speculative because I cannot get the records. I do know they were using REMDESIVIR at the time he was there. I do know he was put on a ventilator. I believe he was murdered on the deadly hospital protocol and I want his death investigated. Please contact me for his name. This is genocide and we will not rest until everyone involved are held accountable. Thank you Senator Johnson for demanding the truth, for the victims and families.
