Who We Are

About Me

I am Chuck's wife and medical power of attorney. I have several years nursing experience.

About Charles Edwin Smith(Chuck)

Chuck was retired E7 MSGT in the USAF(21 years) and retired police Patrol SGT of Madera CA PD.

Covid Medical Breakdown

August 18, 2021-September 21,2021

August 18-24,2021

Positive covid test. Sought treatment several times with primary care physician. All requests denied. Told to seek care in the emergency room. There was two emergency room visits seeking care and monoclonal antibodies. Basic tests completed such as blood work and chest X-ray. No care provided. Told if symptoms worsen to come back.

August 24, 2021

- Went to the emergency Room via ambulance.
- Admitted for Covid pneumonia.
- Discussed preexisting stage 3 chronic kidney disease with ER DR
- refused Remdesivir due to affects on kidneys
- double dose Remdesivir administered anyway without our knowledge
- on room air most of the day until later that night and placed on high flow oxygen

August 25, 2021

- told lungs had improved
- will be sending him home on supplemental oxygen in a couple days. They wanted him on the IV antibiotics for a couple more days. Would go home August 27, 2021
- Given second dose of remdesivir. Again without our knowledge.
- denied food, and water
- forced to stay in bed
- not allowed to bath
- nurses mad at him for not being vaccinated
- still on high flow oxygen

August 26, 2021

- Chuck becomes fearful and anxious
- breathing and speaking fine
- nurses yelling at him, forcing him to stay in bed despite him being able to walk on his own.
- diagnosed with c-diff
- forced to use Bi-pap, says B—pap is painful and wants to be put back on high flow oxygen. Oxygen saturations 87-100%
- Chuck refuses treatment. Tells them and me that he wants to go home @1420
- given first dose of Ativan for refusal @ approximately 1507
- 1507 to 2201 given Ativan x2, oxycodone x2, guaifenesin with codeine x2,
- received does 3 of remdesivir
- more Ativan
- Chuck is now confused, still refusing bi pap
- forcibly restrained for “medical noncompliance”
- administered antipsychotic Haldol and morphine
- 2300-0730 August 27, 2021 administered morphine hourly
- records state “breathing labored, gasping for air.”

All this time, I am unaware of anything that was happening to him. His phone was taken from him. I wasn’t allowed to speak to him. They would not answer my questions.

August 27, 2021

0730 - spoke to Chuck’s nurse. Told he was critically ill, O2 in the 60’s(not true O2 88-100%) had to be ventilated. I asked to speak to his Dr about his condition. Dr yelled at me, said if i didn’t vent him he would die. I reluctantly agreed. Unable to be there due to hospital protocol. Asked for FaceTime call. Granted a couple minutes. Chuck was extremely sedated, he tried but unable to respond. He would be restrained for 3 days. Nurses verbally chastised me for us both being unvaccinated. Told it was our own fault.

August 27-September 21, 2021

I was brow beat daily. Told he was dying and that I needed to sign a DNR order. I spoke one. Most information given was vague. Never told much detail. I never knew how neglected he was because I was kept out. When I was able to see him, he had gangrene over his entire body, so severe I was told to not touch his feet because his toes would fall off.

There is so much more. I have his hospital, billing records and photos to back up what I am saying.
