

My father died alone. He was forced experimental treatments Remdesivir and convalescent plasma that shut down his kidneys and he died of a heart attack not covid. They treated him bad because he was not vaxxed. We were not allowed to see him due to 6 foot rule. He was a veteran and they let us in mins. after he died and they early ventilated him and even called my mom when he was flatlining. They allowed 50k concerts 10 days after "Travis Scott" Utopia, that killed 10 people by being trampled on by so many people there, but my dad died alone. This is not right people help. My dad served this county.
