

My name is Sue Wolf and my brother and sister-in-law were severely affected by the Mayo Clinic's protocols during the COVID pandemic. My brother had been admitted to the hospital for COVID and after nearly a week I got involved and asked the nurse what they were giving him. She gave me the list and at the end, hesitated and said, Remdesivir. I told her I had a real problem with that as I had heard it was causing more harm than good! She said "yes, we are seeing that too"...so I asked WHY are you giving it to him, she said "Dr's orders". So again I asked why is a Dr. giving him something you know is causing more harm than good and she literally said "MONEY"! We then demanded a conference call with family and the Dr. and she bullied my niece (who was in charge of his care) to give him the last dose. That night he was airlifted to the Mayo in Rochester because a room with a ventilator had opened up. Thankfully we gave strict instructions, NO ventilator. In the meantime, his wife was admitted to a small local Mayo hospital in New Prague, MN and I thought her daughter had instructed them NOT to give her Remdesivir but they did. She ended up being airlifted to Mayo Rochester with kidney failure and internal bleeding. Thankfully after several surgeries in 48 hours, she survived! Even though they were under the same roof and was weeks since they contracted COVID, they were not allowed to see each other until they thought she wasn't going to survive and finally let him come up to see her. He was neglected by the nurses knowing he was unvaccinated...days without changing his underwear, food left outside his room till cold, we were not allowed to come to the hospital to advocate for him or bring him fresh undergarments or decent food. Thankfully we are some of the lucky ones who's loved ones survived but the trauma they experienced and continued health issues from the Mayo's protocols will have a life long affect on them. I pray that some day, someone is held accountable for the pain the Mayo's protocols cause SO many!! Thank you for fighting for us!
