

My husband was ill and we felt he needed oxygen support

We went to ER at local VA hospital

He went in I was not allowed

I waited finally a few hrs later I asked at desk

They did not know he was there

I insisted two men in red suits came out to tell me he had c19 and I needed to leave immediately and get tested

I did I was negative

I took him his cell phone and dropped it off

He texted that he didn't know what was going on but they weren't giving him food just a shake because he couldn't eat and they weren't giving wanting to ventilate but he said no

He said a nurse "let him choke" so he could see why he needed to be ventilated

They transferred him to Gainesville because they would know how to deal with him

The next text he said they were trying to talk him into it and he was going to do it

I never saw him after he went through the doors except once on video

Ass pastor said something like he should have gotten vaccinated

Doctors were rude and never did you get to talk to the same one if you could get through at all .

Thank you sir for speaking for those who cannot speak for themselves.

I no longer am able to trust any healthcare provider .
