

Tim Rice, Husband of Lisa Rice, 61 years old. 56 at the time of the incident Happened, Healthy. Went to the gym very often.

Lisa Marie Rice. Loving kind person. Loved by everyone. Healthy energetic. Loved the gym. Loved our motorcycle and our boat.

56 at the time of her passing.

November 25 2021 I took Lisa to the hospital. We both had covid symptoms and had tested positive.

I was told to park the car and when I returned I was not allowed any visitation to see my wife.

I was placed in a separate room. We were able to talk on the phone and Lisa was so very scared.

The doctors almost immediately pushed for a bipap. Lisa did not want that. They did it anyway. After the Bipap was put on all we could do was text.

They pushed for Remdesivir I asked for Ivermectin and was told a flat NO. (Unproven and untested)

They gave her Baricitinib (The nurse laughed because she could not pronounce the name of the drug)

They gave her Midazolam. I have her records showing extremely high doses.

November 29, 2021 they started pushing for the ventilator, Insisted that it would save her. I wanted to try something different and It didn't matter. They did it anyway. Her records show they tried 3 times to vent her and the 3rd time hurt her throat and made her bleed.

I had her cell phone by her side and would call her to talk to her every night

I was finally allowed to see her on 12/19/2021. I told the Dr I know what you are doing. You want me to come down and take her off of life support .

I went down at approximately 9:00 AM and called every one she knew so they could say good bye. Lisa passed at about 2:00 PM 12/19/2021.

Lisa is missed so much by everyone she touched in her life.
