My son, Joshua Krueger, was 20 years old at the time the following accident occurred. He was on a jobsite and accidentally stabbed himself in the leg with a knife at approximately 11:44 am. The wound was severe enough to receive medical care and a coworker drove him to the Emergency Room at Froedtert West Bend Hospital at 3200 Pleasant Vallet Road in West Bend. While on route, he notified me and his father and we arrived at the Emergency Room shortly after he was taken to the back of the ER for care.

Upon entering the ER, I was approached by a security guard who informed me that I was to put on a mask before I could enter. I did not comply and approached one of the admitting personnel sitting behind a shielded desk to ask to see my son. The security guard got much louder and told me again that I must wear a mask and was pushing a box of masks toward me. I said I would not, I just wanted to make sure my son was OK and wanted to see him. The security guard proceeded to threaten me that he was going to call the Sheriff if I did not put on a mask or leave. (The waiting room had approximately 5 people sitting in chairs scattered around the area.) The security guard used bullying tactics to implement the mask protocol which I vehemently am against. I left the ER in order to maintain peace for the rest of the patients and kept in contact with my son via text messaging while parked directly outside of the ER Entrance. Thank you for recieving this report.
